NORTH POINT TECHNOLOGY, LLC CLAIMS SPOT AMONG CENTRAL NEW YORK'S FASTEST GROWING COMPANIES

Endicott, NY (10 MAR 09) – North Point Technology, LLC a system integration and industrial automation engineering firm, has been ranked third among companies in the \$10 million and under category as part of Central New York's FAST TRACK 50.

FAST TRACK 50 determines growth rates by adding together revenue and employee growth; weighting sales over employment by a factor of two to one. Companies must be independent; for-profit; privately or publicly owned; be headquartered or have a large presence in Central NY, and have at least a four-year operating history.

“Most of our new business comes to us as a result of client referrals,” says Robert P. Lee, PE, Principal of North Point Technology, LLC. “So being recognized for our growth is also a reflection of our clients' satisfaction which makes it even more fulfilling.”

North Point Technology continues to thrive in 2009, primarily focusing on growing their existing partnerships with manufacturing OEM's, as well as pursuing new opportunities with manufacturers and municipalities all over the world.

“We have had a heavy focus on advanced water and wastewater filtration systems in the last few years, but our company also provides engineering consulting services to clients in the aerospace, food, electronics, glass and wood products manufacturing industries, as well as to Cornell University,” says Lee.

North Point Technology, LLC was founded in 2002 by Robert P. Lee, PE and provides industrial automation and control system engineering services, including consulting, programming, and commissioning for a variety of industrial clients and municipalities. The firm currently employs eight, including a staff of specialized engineers who work on projects throughout the US and internationally. North Point Technology has offices in Johnson City, NY; Endicott, NY; and Park City, UT. www.northpointusa.com.
