## **NORTH POINT TECHNOLOGY, LLC NAMED ONE OF CENTRAL NEW YORK'S FAST TRACK 50 FOR SECOND CONSECUTIVE YEAR**

#

**Endicott, NY (10 MAR 09)** – North Point Technology, LLC a system integration and industrial automation engineering firm, has been named one of Central New York's fastest growing companies for the second consecutive year. North Point was ranked sixth among companies in the \$10 million and under category as part of the FAST TRACK 50 awards process.

FAST TRACK 50 determines growth rates by adding together revenue and employee growth; weighting sales over employment by a factor of two to one. Companies must be independent; for-profit; privately or publicly owned; be headquartered or have a large presence in Central NY, and have at least a four-year operating history.

"Any growth in a challenging economy is something to be thankful for, so we are extremely proud to be among the leaders in Central New York," says Robert P. Lee, PE, Principal of North Point Technology, LLC. "It certainly reaffirms our decision to remain committed to Upstate New York and our valued customers."

North Point Technology plans slow, steady growth throughout 2010, affording them the opportunity to add engineers with very specific skill sets to their staff. North Point continues to pursue new opportunities with manufacturers and municipalities around the world while strengthening and expanding its existing partnerships.

North Point Technology, LLC founded in 2002 by Robert P. Lee, PE and Lisa Lee, has grown significantly in size and scope of supply. In addition to engineering services, North Point has developed proprietary software unique to its industry, allowing them to offer clients more cost effective software solutions with shorter development and commissioning periods. The firm employs a highly specialized staff of engineers who serve clients throughout the United States as well as Australia and the United Kingdom from North Point's offices in Upstate New York and Park City, Utah.
